

DIGITAL GRADE LASER

DL150

Long range (1300m), Tough (rental standard)
Water proof (IP67), Total control remote (250+m)

 **AMA LASER**
Made in Sweden
www.amalaser.com

Almost 30 years ago AMA Laser introduced the worlds first fully automatic, fully water proof diode laser. The DL 150. Many of which are still being used on construction sites around the world.

We at AMA Laser believe that all the products that we design and build should be simple to use, fit for purpose and uncompromising in construction. If we can make products that last a life time then with a bit of luck we will have customers for life.

30 years on we are now pleased to introduce the next generation DL150. With dual grade capability, full function long range remote control and high spec long life rechargeable batteries.

AMA DL150 two way radio remote control. Ergonomically designed with a working range of several hundred meters. Controls all of the lasers functions.

Fully waterproof cast aluminium housing AMA timeless design. Gas purged with dry nitrogen. Built to last.

Tilt function - Push the DL150 too hard and it will need to be restarted. Your set up height will need to be rechecked. No chance of height errors.

AMA 's heavy duty instrument case. Made of ABS plastic, designed to withstand many years of abuse dealt out by transport couriers.

Technical Specification:

- ✓ +/- 10% grade in both axis
- ✓ 650M radius, operating range
- ✓ 250m radio remote control
- ✓ Beam sector shutoff. 8 Sections variable
- ✓ Rotation 0, 600 and 800 rpm
- ✓ Variable scan mode 10-80°
- ✓ Water proof IP67
- ✓ Run time 50 hrs/charge
- ✓ +/-5mm per 100m
- ✓ Weight 4,5KG
